A Roiler Explodes and Kills

Five Persons. RICHMOND, VA., March 23.-Later telligence from the boiler explosion at Hall's saw mill greatly increases the extent of the casualties. When the boiler, which was a 25 horse power, exploded, a number of persons were at work in the mill. Five were killed, J. C. the House in precisely the same shape in which it came from the Committee. The retrenchment under this bil amounts to nearly a half million of dol lars. It remains to be seen what a Re publican Senate will do with it.

According to the political gossips. there is to be hot work in the Senate soon,-in other words, a sharp opening fire from the auti-Administration Republican skirmishers upon the President, to be followed by an advance of heavy artillery along the whole line. Howe, of Wisconsin, has given quasi notice that he will commence the attack on Monday, and the alleged sins of one Judge Whitaker of New Orleans, when he was an officer of the Treasur; Department, in 1866-7, constitute the peg on which he will hang his excoriaion. What the connection may be be tween Whitaker and Hayes remains to be developed; but the connection be-tween Hayes and Howe consists in the fact that the former refused to appoin the Wisconsin wind-bag to a vacant Justiceship on the Supreme bench. Conkling, Blaine and Edmunds it is given out, will follow up the onslaught. The former, "they say," will reserve his grand illumination until the smaller pyrotechnical explosions are

a late speech of the Hon, H. L. Fort, o Illinois, I have just read a paragraph which goes to prove that members o Congress are not always "up" in thei reading. Illustrating a point, he says Somebody once told a story about a English mastiff which, crossing the London bridge, with a liberal-sized beef steak in his mouth, chanced to see the Railroads, through their representation here, to day agreed on a combination till May, as against the St. Louis roads which he mistook for another mastiff with a beef-steak in his mouth somewhat with a beef-steak in his mouth with a beef-steak in his mouth with a beef-steak in his mout magnified, and, having an appetite for all he had and more, leaped in head-long o take the other piece of meat also, bu Steamer Magenta blew up opposite Yarborough this morning, Alfred Reynolds, of Sing Sing, and one unknown who lived more than five hundred years. Now Æsop, the Greek slave, before Christ, when "London bridge was undreamed of and "beef-steaks were probably unknown to the Atheni an cuisine, told the story much more simply, thus: "A dog had stolen a piece f meat out of a butcher's shop, and was crossing a river on his way home,

when he saw his own shadow reflected in the stream below. Thinking that it was another dog, and another piece o meat, he resolved to make himself master of that also, but, in snapping at the supposed treasure, he dropped the bit he was carrying, and so lost all ! This little item will serve to point this moral: How much more effective than the periphrastic and "high-falu-tin" style of most of the modern Buncombe Congressional oratory is the

simple and severe phrase of the best ancient speakers and writers, as a gen-eral rule? And not only of the ancients, for Mr. Webster, for example, was great user of monosyllables and th plainest Anglo-Saxon terms, and Mr Calhoun was terse and unornamental almost to a fault. The late Geoge E Badger possessed also, in a remarkable degree, the talent of simplifying his wisest utterances,—and how many and how great they were !—so as to adapt

them to the commonest comprehen From the report of the Public Prin ter, which I have before me, I find that the actual cost of the printing, binding, engraving and lithographing for th government, as executed at the Government printing office, for the pine months ending June 30, 1877, was \$1, 182,979.43. There might be much say ing in this department of the public service. Everything is printed, and immense numbers of useless document are printed, until the accumulation of matter in the proper receptacles is almost mountain-high. Undoubtedly nowever, the present system is bette than the old contract or election plan o

choosing the Public Printer. Owing to the exceptionally oper winter, and the almost complete absence of frost in the Southern section of the Union, the medical officers of the gov ernment and of maritime ports mai that there is great danger of yellow fever the coming season. The stringent measures to prevent this wil be urged upon Congress, and represen tatives of the Southern boards of health have been in Washington with a view

to this end. I observe among the North Carolin ians in the City, Maj. Engelhard, Secre-tary of State, Col. Staples, of Greens boro, Messrs. McCloud and Cocke, of Asheville, and Humphrey and Bonitz

of Goldsboro. Very few undertakings of modern imes will command the acclamation of mankind more worthily than the opening of the Mississippi,—the resul of the scientific and skillful engineer ing work of Capt. Eads. The undertaking comparable with it is the Suez Canal, which though more costly and of more present importance, will in the coming time, be found of no great er consequence to the commerce of the world. The tonnage ascending and descending the South Pass of the Mississippi will eventually be as great and the freights as valuable as the traffic passing from Sea to Sea through the Canal. At a recent meeting of the New Orleans Chamber of Commerce transported from St. Louis and transferred to Ocean bottoms at a cost of three cents a bushel! This is a striking may yet monopolize the grain-carrying trade between Europe trade between Europe and the great West. In that event, that city has a magnificent destiny before it. S. G.

Suggestions from Carteret.

CARTERET Co., March 21, 1878. To the Editor of the News.

Sin: The Democratic journals of this State, are casting about for suitable candidates for the Supreme Court, the name of Judge Schenck, and other prominent gentlemen have been suggested in that connection. To these we take the liberty to add the name of Hon. C. C. Clark, of Craven, a gentlemen who has always in dark hours of man who has always in dark hours of adversity as well as in bright hours of prosperity, been steadfast and true, who has never, when Radicalism was rampant and triumphant, failed to let his voice, clear asa bugle-blast, be heard rallying the true men of the country to victory. He is a man who is controlled by principle and conscientious motives, and is one of the foremost lawyers in Eastern North Carolina. With Clark from the East, and Schenck from the West, with Smith, or Fowle from the center, the Judicial ticket for the Su-

preme Court will be complete. The people of this county, men, wo-men and children, are for Gov. Vance or United States Senator, against the combined world. The name of Jno. D. Stanford, of

Duplin, has been prominently brought forward in connection with the Solici-torship of this District. There is no man in the District the people of this county prefer to Mr. Stanford. With Vance in the United States Senate, Clark and Schenck on the Supreme Court Bench, and Stanford for olicitor, our people would be political-

ly happy.

The News has been a faithful senti nel on the watch-tower in many a political contest, and it affords us pleasure to know its services are largely appreciated. May it prosper and live many years.

ALAMANCE.

Aid for the Oxford Orphan Asylum --- A Worthy Object ---Dramatic.

(From our own Correspondent.) COMPANY SHOPS, March 21.-In lancing at the State papers, it is not a rare thing to see ministrel and other troupes advertised for Raleigh, Wilming-ton and other cities and towns of the State, and we are prone, at times, to deem ourselves fortunate or unfortunate, as the case may be, by reason of our inability to enjoy their influences, sometimes for good and sometimes for evil. But our town is not yet of sufficient importance to attract those troupes whose only object is money making for personal ends, and, doubtless, this is the object of the great majority of them. Perhaps we are not less wise, then, and we are certainly much better off, after all, especially, since we can afford a local troupe that can put Cal. Wagner's celebrated minstrel troupe "to the blush," even with the "black on," and one, too, whose object is a charitable one. A short time since, learning from the State papers and from other sources, that the Oxford Orphan Asylum was in destitute circumstances, and that the poor orphans were needy for the real necessities of life, to say nothing of com-

with Capt. T. O. Troy "Ring Leader," and on yesterday evening they gave their first highly refined, pleasing, witty, and mirth-provoking entertainment in the Grange Hall, for the express purpose of aiding the Orphan Asylum. The rendition of the various pieces seected for the occasion was par excel nee, and their selections were good. and in many instances original. Some of their local witticisms and "hits" we understand fell heavily and cut deeply

Some of the "young men" were old men, but all acted young, and well, their There were near, if not quite, two hundred and fifty persons present, and after paying all expenses incident to or-ganizing, equipage, for advertising, &c. &c., twenty-nine dollars and fifty cents were left for the orphans, which, with the hearty good wishes of the troupe

and of our people generally, will be forwarded to the Superintendent. The troupe will give other entertainments from time to time for the same audable purpose, and, if they come out with as flying colors in the future as they did last evening, your correspon-dent will insist on their going to Ral-eigh, and other cities where they can procure halls large enough for the crowds they will unmistakably attract.

Long may they live and prosper. To-morrow evening the young ladies will give an entertainment, consisting of charades, tableaux &c., for local benevolent purposes, and we predict for them full house, and for the full house a happy evening. Of course, it will be a success. We pronounce it such even now. We never heard of but one enterprise failing-worthy enterprise-on account of women, and that one, one of the minstrels told us about yesterday evening—a newspaper—they spread the news faster than papers, talk did it.— Their talk sometimes makes men failthe little word no. for example

The Weldon Bridge,

WELDON N. C. March 28d, 1878. The fifth span of the new iron bridge of the Seaboard & Roanoke Railroad over the Roanoke river at this place vas completed yesterday, and to they are raising the sixth and, for the

present, last span.

This makes eight hundred and forty 840) feet of splendid iron bridge, spanning the main stream of the river the southern bank to the island, at a height of about sixty feet above low

water. From the termination of this iron bridge to the northern bank of the river, across the island and the other stream, is about nine hundred feet of wood bridge which was not carried off by the Great Fresh. This, I am told, it is he intention of the company to replace in the early future with iron; two or three hundred feet of which, it is thought will be put up this summer.

The new bridge contains about 350 tons of iron, and is from the works of

Messrs Clark, Reeves & Co., near Philadelphia, Pa. They expect to finsh next week what they have undertaken to do here at present: their men on this job will then go at once to New Orleans to put up some work on the New Orleans and Mobile Railroad, returning here in the summer.

ridiculous. Then why Newbern? In Colonial days the residence of the Royal Governor and a capital city; for two centuries the centre of a society distin-guished for high culture and abounding in the grace of good breeding, New Berne has always been one of the crown ewels of our noble old sovereign State Controlling at one time the chief com merce of North Carolina, the introduction of steam navigation dispersed her deets of merchantmen; railroads turned the trade of the commonwealth into channels that led to the cities and ports of other States; and, in the march of progress and movement of time, her iistinguished and enterprising sons and cherished daughters have been scattered over a continent. But wherever they roam, or in whatsoever clime they reide, who have once been identified with New Berne, turn with the affections of fond memories to the old elms, the haded streets, the placid waters of the Neuse and Trent, the hospitable homes and generous fire-sides of the Athens of

the Old North State. BUSINESS AND MANUFACTURING ENTER-PRISE.

There is manifest here now a very commendable and highly gratifying spirit of business industry and manuacturing enterprise. Dr. John L. Watkins, formerly of Milton, one of the first in the State to put up a package of smoking tobacco for sale, is manufacturing on an extended and increasing scale, popular brands of cigars that are acquiring reputation and commanding sales in other States. Mills and Walker are successfully manufacturing tobacco. Mr. William Palmer manufactures cigar boxes for this and other George Allen & Co., in connection with their hardware and agricultural store, do an extensive business in agricultural implements of their own manufacture as well as in machinery and implements imported. There are two or three carriage and buggy making stablishments; three large saw-mills which, besides supplying the home de mand, ship largely; a good shingle and stave trade to the West Indies, and in which coasting vessels are drawn up, overbauled and repaired; small ship-yards in which are constructed vessels suitable to the trade; boat-building, and a sail-loft where canvas for the various water-craft is supplied; builders and contractors who are receiving ime ; the two hardware houses of Cutlar and Gates and B. L. Churchill, who manufacture largely of stoves, sheet-iron and hollow-ware and roofing. And in general merchandise there i every line, in full proportion, from ship-ping, commission and heavy groceries, ladies' and gentlemen's dress-goods. and fine jewelry.

A BUCKET FACTORY.

In the old sash and blind-factory of corge Bishop, conducted on a large scale prior to and succeeding the war. Bishop and Mathews have erected the necessary machinery and are now man-ufacturing pails and buckets of native juniper, in point of finish and quality equal to anything ever placed on the American market. The capacity of their works is two thousand brassbound buckets per day, and they are at present turning out eighty dozen. The work of making these buckets is all by machinery, from blocks of wood, and the bailing and binding is all done in This enterprise gives em ployment to skilled mechanics, utilizes trees growing in our swamps, and gives good wages to timber-getters who would otherwise be idle, and themselves and families in want. The articles of this manufacture are principally shipped North, where up-county merchants go, and vainly imagining that they are buying yankee wooden-ware, actually bring back North Carolina buckets, by Bishop and Mathews, of NewBerne. These gentlemen will probably add to their works the manufacture of hubs, and in part take the place of those Northern manufacturers who freight our

native woods North, and convert them into manufactures for our consumption. THE COTTON FACTORY. The Neuse Manufacturing Company composed of some half-dozen public spirited citizens, native and adopted, as erected a cotton factory, and are about setting off their spindles in the full tide of triumphant hum. Having erected a substantial and well arranged building, specially adapted for the work of spinning, this company, having put in the latest improved machinery, is ow manufacturing excellent yarns by a process which manipulates the cotton fresh from the field, in the seed, or from cotton ginned and baled, as either may offer, or the spinners choose. Such an enterprise affords, in any community where set on foot, remunerative and congenial employment to worthy girls and boys, and they who project them are public benefactors, and the hearty good-will of all must be enlisted in behalf of their complete success; and it is impossible to imagine that such men can fail. The gentlemen of commendable cuterprise and creditable public spirit, who here deserve well of their day and generation, are, George Allen, Washington Bryan, Richard Berry, Daniel D. Stimson, T. A. Green, Jesse W. Claypoole and Jas. W. Walker. Of these, four are native and three adopted citizens, Mr. Claypoole is President, Mr. Berry Superintendent, Mr. Allen Treasurer, and Mr. Bryan Secretary.

EXPORTATION OF NATIVE WOODS. Quite an industry has developed in the cutting and shipment of what is known in all parts of the State as the "Holly." This timber is in great demand North for piano keys and en-

graver's blocks. Almost every steamer graver's blocks. Almost every steamer carries a freight of the logs of this timber. A representative of an English firm is here for the purpose of procuring "Dogwood" timber, which is taken away, converted into handles for cheap cutlery, bobbins and other like simple uses, and then sold back to us. A shipment of ninety goods of degreed shipment of ninety cords of dogwood timber was made this week from a

New Beine is an ancient city. The finger of the has effaced the traces of its Swine agin, and modern orthography has exayed the unnecessary task of perverting its name. One has but to unite Old Berne to demonstrate the exceeding inappropriateless of Newbern. One does not say Newbrunswick, Newengland, Newbampshire, Newyork, Newjersey, Neworleans, or Newmexico; and Northearolina would be absolutely ridiculous. Then why Newbern? In cord. number of sailing vessels plying the port from Hyde county, "corn crackers" to "three masters." Connecting the interior through the Neuse and Trent and their tributary water courses, are the Steamers Neuse and Contentnea, and various lines of flat-boats, which combine to render freighting service at very ow figures to all farmers accessi thereto, which is a very great consid eration, and an advantage to which him of the up country is a stranger.

HARBOR AND NEUSE RIVER IMPROVE MENTS. An effort is now being made before Congress to still further improve the means of transportation in this section. A strong petition, backed by delegations from all the counties, and authentical by resolutions of public meeting. ings, has gone to Congress, praying an appropriation of one hundred and fifty housand dollars for cleaning out Neuse river as far up as Smithfield, improving the harbor of New Berne, and cleaning out the channel down to the mouth of he river, and removing the "swash" at Hatteras, which, if done, will reclaim thousands of acres of the most productive lands in the valley of the upper Neuse, open the river to steamboat navigation as far as Smithfield, and from below permit the passage of vessels to New Berne drawing twelve feet of water. It is understood that the Nort arolina delegation is a unit on the subject, and there can be no good reason for withholding the appropriation; on the contrary, every consideration of right and justice demands that it be im

ediately granted. A FEDERAL BUILDING WANTED. Steps have been taken to induce the overnment to purchase the "Weinstein Building" for a United States Court House, Custom House and Post Office. The building is one of the best and most complete fire-proof brick buildings in the State; cost to erect it \$36,000 in 1869, and is now offered for \$10,000. Less than ten thousand dollars will readapt it to the purposes of government requirements, and when so arranged will be, to all intents and purposes, as good as the building at Raleigh, which has cost \$400,000. Considering that this forts, moved by a spirit of philanthropy, some of the young men of this place organized themselves into a troups, known as the Dixie Minstrels; received nothing but a Federal Cemetery, it is difficult to conceive how Congress can refuse the Neuse River Appropriation, or withhold the money necessary for the proposed Federal building, especially, in reference to the latter, in view of the fact that the government more orders for improvements in the city than have been noted for a long now pays out, in the way of office rents in New Berne, \$2,500 per annum, and gets poor accommodations at that

The dime party given by the ladies, for the benefit of the M. E. Church, was a grand success, and the handsome sum of \$200 was realized. This room was handsomely decorated with pictures and the sweetest music from the organ, the violin and guitar, was dispensed. But the attractive feature of this room, was the cage of wild and domestic animals, the comments on each one eliciting frequent bursts laughter and applause. The animals were loaned from Mr. T. N. Carlisle's large collection of toys. This was a new feature and was highly enjoyed by all who saw them, and a nice little sun was taken in. helping to swell the general fund. CARARRUS. The Ball in Motion--Meeting of the Democratic Executive the whole range of literature. It is a

Committee. (From our own Correspondent.)

CONCORD, March 22, 1878. Our County Democratic Executive Committee had a meeting yesterday, and decided to call a mass meeting on the second Saturday in April, for the purpose of appointing delegates to our State and District Conventions, to convene soon for the purpose of selecting a ticket for Supreme Judges and a Soliciter for our District.

Cabarrus is a unit for D. Schenck for Chief Justice. Our mass meeting, will with uncontrollable enthusiasm, instruct her delegation to poll our full strength in the State Convention for him. to fill in the State Convention for him, to fill that position.

They would with much pleasure support that lofty, pure, tried and true, gentleman, lawyer and Statesman, Hon.

associates. They are willing that the East should select her man for the other place. If there is a single man in Cabarrus opposed to the renomination and elec-tion of our present Solicitor, Maj, W. J. Montgomery, he has not expressed himself.

THOS. S. ASHE, of Anson, for one of the

Our township conventions are call-ed for June the 15th, and our county convention for June 29th, when our full ticket will be made out for the several offices to be filled this year. We do offices to be filled this year. We do not know whom we will send to the Legislature. Col. Paul B. Means is spoken of. Of one thing you may be assured, whoever we send will be an uncompromising VANCE man for U. S. Senate. Stanly county, according to our rotating custom, furnishes the Senator this time, but that is immaterial to VANCE. Cabarrus claims to be the Banner Vance county in North Carolina, but Stanly is disputing her right to this honor. We would like to compare figures. Let us see: In our last election Cabarrus gave Vance 1630, Settle 924. What county can beat us? Number 6 Township, Cabarrus county, claims to be the Banner Township in

of election, and noticed a small package lay untouched on the table, late in the evening, addressed, "No. 6 Township."
He asked one of the managers "what
this was," he replied, it was a bundle
of "Logan tickets," and says he, "you

take it back to town, write on it, 're-jected and returned,' seal it up in a wrapper and mail it to Judge Logan, tell him we had no use for one of them."
We did as instructed, and have not we did as instructed, and have be seen a Logan ticket since, nor have we heard from or seen his Honor Judge Logan. Later in the evening some four or five men with sad and dejected counfor the following exhibits:

Solution of the growth of 1878.

Solution or five men with sad and dejected countenances, came marching up together, each with his hand stuck deep down in his pocket, and with it drew therefrom a small piece of white paper tightly folded, and placed it in the box; when the votes were counted, Schenck had received all except four or five votes.

An Impromptu Political Meet-Ang. expessiondence of the News) Marion, March 20, 1878. An impromptu political meeting was held in the court room to-pay, during recess. The object was to obtain delegates for the State Convention, with in-structions to go for Schenck for Chief Justice of the Supreme Court; and also delegates for our District Convention,

with instructions to go for Mr. A. C. Avery for Judge of the 8th Judicial District.
Resolutions were adopted endorsing the course of our faithful and laborious representative in Congress, R. B. Vance; also J. M. Gudger, as Solicitor. I am somewhat apprehensive that this premature action will not meet the approbation of many of our good citi-zens, because they were not heard. It was without notice or previous consultation, and in my opinion, did not re-flect public sentiment. Intelligent citizens of the county, who do their own thinking and are controlled by their

A Scoffer Rebuked. A startling event that occured

Wednesday night last in the Methodist Episcopal church at Leiter's Ford. nd., is regarded by many people in Indiana as a direct interposition of Divine Providence for the punishment of the scoffer. A revival had been in progress in the church for two weeks. Elias Bidinger, a married man about twenty five years of age, and Robert King had been disturbing the meetings by making sport of those who led the services. On Wednesday night about seventy-five persons were present.

During the exercises Bidinger and
King began to create a disturbance.

Mr. Jones, the minister went to expostulate with them, laid his hand upon Bidinger's shoulder, and urged him to change his way of life. Bidinger re-plied with an oath that he would never change his ways. A few moments af-terward, while Michael Phandle a N. C. In this same election she gave

AGRICULTURAL LIME. To The Cotton Growers of North

The Commissioner of Agriculture having decided that I cannot have an Agency in your State for the sale of this cheap and valuable rertilizer, without paying a tax of \$00—which I cannot do without materially advancing the price. I solicit your orders for it, which will be promptly filled on the following terms on board cars in Kichmond:

\$12 Per Ton Cash, or \$15 Per TON for an approved acceptance on Raleigh, Charlotte, Wilmington, Petersburg, Norfolk, or Richmond, payable on the 1st of November next, or at 8 months from date.

I respectfully refer you to Messrs. J. J. Thomas, Kaleigh; J. W. O'Nell, Clayton and others who sold it last spring, and to the various farmers who used it, who say it makes as much cotton as fertilizers costing 3 or 4 times as much.

The Stinging Sensation

In the guilet called "heartburn," why, it is impossible to conceive, since the heart has nothing to do with it) is caused by the acetous fermentation in the stomach of the food contained in it; by an overplus of the gastric luce, which is itself a powerful acid, or by the unnaturally acrid quality of that secretion. The ordinary way of treating this symptom, for it is nothing else, is to administer bi-carbonate of soda, an alkait, to neutralize the acid. But sour somach cannot be cured by alkalis, which tend to weaken the digestive apparatus. A far better remedy is Hostetter's -tomach Bitters, which strengthens the cellular membrane, the seat of the difficulty, regulates the flow of the gastric secretion, improves the quality if vitiated, and puts the stomach into good working order. Perfect digestion fo lows as a natural sequence, and there is no more trouble from heartburn or sour stomach. The liver and bowels a elso thoroughly regulated by this sovereign alterative. The Stinging Sensation

Among the Dead Failures

Of the past, how many bogus nostrums may
be numbered! Beginning their careers with
a tremendous fourish of trumpets, blazoned
for a time in the public prints and on flaming
posters, soon, but not too soon, were they relegated to the limbo of things lost on earth.
But Hostetter's Stomach Bitters is a living
and thriving remedy. It goes on, curing and
to cure. Neither underhand nor open competition affect it. On the contrary, contrast
with inferior rival preparations only increase
its popularity. It has been repeatedly limitated, but without success. Counteriets of
it have been surreptitiously introduced, but
have fallen flat. Everywhere it entrenches
itself in the confidence of the people; and
well it may for it is a thoroughly reliable invigorant of the feeble, banishes dyspepsia
and constipation, braces the nerves, cures
